Sorry, I am confused, is the \$704,000 for sampling part of the \$500,000 ceiling?

Subject: Dimock

Dana T.:

As you know, just got into Potomac Yards for a couple of meeting this afternoon

Just spoke with Dennis C. Here's information that should help address the questions from Mathy:

1). Regarding site costs, the Action Memo ceiling is \$500 K, the message that Mathy forwarded to us already provided the other costs. \$285 K are the costs to date (invoiced thus far) under the action memo. \$704 K are costs to date associated with the sampling and analysis work. These are capture outside of the action memo as under CERCLA 104b assessment authority. This then equates to \$989 K of total costs to date.

2). Understand from R3 that the HQ EU should be receiving from R3 the 3rd week of sampling results by COB today. As I indicated earlier, the EU staff is ready to conduct their review right away once we receive the data. As I also mentioned, yesterday we did receive an initial draft risk communication write-up for manganese. While we have not seen the data, as of yet, the region does know that there are some results that revealed elevated manganese that will need to be discussed. I believe that this (ie. manganese) was mentioned during the Sr. Managers Dimock call last Thursday.

3). With regards to methane tracing and ORD, understand from R3 that they have a call scheduled for tomorrow late morning with ORD personnel to discuss technical support on this matter. We can have folks from the HQ EU participate on the call. Understand that the HQ ORD point person on this topic is Jeannie Briskin.
